Karaganda State Industrial University (Temirtau, Kazakhstan) is one of the leading technical universities of Central Kazakhstan, carrying out the training of qualified specialists for the enterprises of mining and metallurgical complex, energy, construction, transport and engineering industries.

One of the main advantages of KSIU is the presence of modern material and technical base, which allows to prepare qualified professionals with the necessary in modern conditions knowledge and practical skills. Research database of the University presented by the Laboratory of Engineering Profile "Electronic Microscopy and Nanotechnologies", Scientific-Research Institute of construction industry (SRICI), pilot production facilities and research laboratories, which are equipped with modern equipment made in the USA, Japan, Russia, Germany, etc.

University scientists are leaders of research projects financed by the budget funds and other funds involved in the national contest for the awarding of state awards and research fellowships of Kazakhstan, improve their skills at leading universities and abroad.

In the period from 2012-2014 academic staff of the University had a positive experience of participation in the TEMPUS project "Qualification frameworks in Central Asia: Bologna-based principles and regional coordination" (QUADRIGA), whose goal was the development of qualifications frameworks in the countries of Central Asia and the improvement of educational systems through the further development of the existing requirements to the educational standards in certain areas based on the new European approaches. Results of the project are now widely implemented by higher education institutions at the developing of educational programs with the qualification framework and professional standards.

For the development of international relations in the field of scientific research, education, development of academic mobility, to participate in various projects of the "Erasmus+" program Karaganda State Industrial University proposes to consider the possibility of cooperation with the universities participating in the international research projects, including in the frames of "Erasmus +" program.
